Summary:

Highly skilled and experienced software engineer with 4+ years of experience in designing, developing, and maintaining software applications. Proven track record of delivering high-quality software on time and within budget. Strong ability to work collaboratively in a team environment and to adapt to new technologies.

Education:

Bachelor of Science in Geology, Achievers University, Graduated September 2017 Master of Science in Computer Science, University of Hertfordshire, In view May 2023

Technical Skills:

Programming languages: Java, Python, C++, JavaScript, C, Dart

Web development: HTML, CSS, JavaScript, ReactJS, ExpressJS, Django, NodeJS,

Mobile development: Flutter, React Native Databases: MySQL, MongoDB, Oracle, Firebase Operating Systems: Windows, Linux, macOS

Version control: Git, Github

Work Experience:

Programming Instructor at GMTsoftware

December 2020 - Present

- I teach students how to programme in a variety of languages, including Python, Java, JavaScript, and Dart.
- Conduct hands-on workshops in Python, Flutter, Dart, Java, JavaScript, and React, and invite technology specialists to assist in training people across Nigeria.
- Identifying technologies that can be used to improve a company's products and services
- Presenting reports on a company's technological status, goals, and progress

Software Engineer at GMTsoftware

June 2020 – December 2020

- Develop and maintain software applications using Java, Python, and C++
- Collaborate with cross-functional teams to deliver high-quality software on time and within budget
- Implement new features and improve existing functionality
- Write unit tests to ensure the quality of the code

ReactJS Developer at Femi Festus Properties

January 2019 - May 2019

- Developed and maintained web applications using HTML, CSS, JavaScript, and ReactJS
- Worked closely with the design team to implement visual elements

- Utilized Git for version control and collaborated with other developers using pull requests and code review
- Participated in code reviews and provided constructive feedback to improve code quality
- Worked on an Agile (Scrum) Development Team to deliver regular updates to business team and project managers.

Internship:

Software Engineer Intern at JPMorgan Chase & Co. July 2020 - Sep 2020 (3 months)

- I used the Yahoo Finance API to work with a data feed of stock price information.
 created a web application using Git and Python that lets users view stock prices and charts.
- Using ReactJS, TypeScript, and Web Applications, I implemented the perspective open code to prepare for data visualisation.
- I helped clear the backlogs for future projects.

Volunteer:

Software Development Mentor for BuildForSDG Challenge COHORT 2, 2020.

- Guide 49 Developers from different countries across Africa develop and deployed a Web App to solve one of the SDG.
- Design and manage Database for selected project.
- Solve project problems using JavaScript and NodeJS

Projects:

- Tech4Work Project: A web-based application that allows employers to track different technologies used by their employees. Implemented using HTML, JavaScript, MySQL, and PHP.
- Gadgets Project: A mobile application that allows users to buy different gadgets. Implemented using Dart, Flutter and Firebase.
- Other projects can be found on my GitHub https://github.com/felixfrz

Certifications:

AWS Certified Cloud Practitioner
Machine Learning with Python
Data Analysis with Python
Scientific Computing with Python
Back End Development and APIs
Front End Development Libraries
Responsive Web Design
JavaScript Algorithms and Data Structures

Languages:

English (Fluent)
French (Beginner)
